

EthioGlobal Digital

Official Website Documentation & Project Overview

Ethiopia's Premier Digital Agency Platform

A full-service digital agency focused on premium UI/UX, performance, and AI integration.

About The Project

Welcome to the official frontend repository for EthioGlobal Digital. Based in Addis Ababa, Ethiopia, this platform showcases our services, portfolio, and client engagement gateway. The site emphasizes micro-interactions, mobile-first responsiveness, and a premium dark-mode aesthetic.

Key Features

- **Smart Navigation:** Glassmorphism effects with active section scroll-tracking.
- **100% Responsive:** Optimized from mobile touch targets to ultrawide displays.
- **EthioX AI Chatbot:** Custom-built assistant with desktop drag-to-resize capabilities.
- **Dynamic Portfolio:** Swipe-enabled project showcase with floating stat cards.
- **Performance First:** Lazy loading and Vite-powered optimization.

Tech Stack

- **Framework:** React.js (Hooks & Context)
- **Build Tool:** Vite
- **Styling:** Tailwind CSS
- **Data Handling:** Axios & RESTful API Integration

Project Structure

```
src/
├── api/           # API configurations
├── assets/        # Static media
├── components/    # Reusable UI units
├── sections/      # Page sections (Header, Hero, Portfolio, etc.)
├── App.jsx        # App logic
└── main.jsx       # Entry point
```

Architectural Highlights

The project employs several advanced techniques to ensure a premium user experience:

- **Hover-Capable Detection:** Seamless interaction switching between touch and mouse.
- **Advanced Scroll Locking:** Technical prevention of layout shifts during modal interactions.
- **Mobile-First Modal System:** Custom bottom-sheet implementation for mobile users.
